## EXPERIENCE

### Frontend Engineer

February 2024 - February 2025

#### Zeptik-Intern

Lucknow, India

##### Achievements/Tasks

- Developed and contributed to a web platform similar to OLX for buying and selling second-hand items using Next.js and TailwindCSS, enhancing my understanding of front-end development.
- Gained hands-on experience with React Native, building a mobile app version of the platform, and worked with Docker and Kubernetes for containerization and deployment.
- Improved project management skills by working with tools like Jira and Notion, ensuring smooth collaboration and task tracking across the team.
- Learned to use additional tools like Ngrok for secure tunneling and integration, improving app testing and development processes.

### IT Trainer

September 2021 - September 2022

#### Institute of Skills and Rural Development

Saharanpur, India

##### Achievements/Tasks

- Created and delivered training modules for MS Office, Photoshop, CorelDraw, HTML, CSS, Networking, and Security, boosting student performance by 25%.
- Used new teaching methods like real-world case studies and practical labs, improving student understanding and application of concepts.
- Mentored over 100 students, helping them with their studies and projects, leading to more successful project completions and higher exam scores.

### Frontend Trainer

June 2023 - September 2023

#### Credible Academy

Saharanpur, India

##### Achievements/Tasks

- Led the creation and launch of a new curriculum for HTML, CSS, JavaScript, and React, increasing student project completions by 30%.
- Created an interactive learning space with hands-on projects and coding challenges, improving student engagement and knowledge retention.
- Organized workshops and webinars that attracted over 200 participants, greatly enhancing the institute's visibility and reputation.

### Business Development Executive

March 2023 - May 2023

#### Wealth Clinic

Noida, India

##### Achievements/Tasks

- Developed client interaction strategies that increased client acquisition and retention by 20%.
- Performed market analysis and competitive research to find new business opportunities, resulting in targeted marketing campaigns.
- Worked with different teams to improve client communication processes, boosting client satisfaction and business efficiency.

## EDUCATION

### Bachelor of Science (Computer Science)

2023 - 2026

#### Aligarh Muslim University

Aligarh, Uttar Pradesh

## SKILLS

• HTML • CSS • JavaScript • React.js • NextJs • React Native • React-Redux • Tailwind CSS • Bootstrap • Parcel • Webpack • Server-Side Rendering • Babel • Jest • Firebase • Docker • Jira • Python • Notion • WordPress • Problem Solving • Data Structures and Algorithms

## PROJECTS

### CinemaFlixGemini [link](#) : A Netflix clone with AI features

- Smart Search:** Used Gemini AI for personalized movie recommendations, boosting user engagement by 30%.
- Authentication:** Implemented secure user login with Firebase and Google Sign-In.
- Secure Routes:** Created restricted routes for premium content, enhancing user retention.
- Responsive UI:** Built a responsive and modern UI with Tailwind CSS for a consistent experience across devices.

### StreamMaster [link](#) : A YouTube clone with advanced features

- Improved Performance:** Used lazy loading, debouncing, and caching to make the app faster by 40%.
- State Management:** Managed app state efficiently with Redux, ensuring smooth video playback.
- Responsive Design:** Designed with Tailwind CSS for a responsive interface across all devices.
- Deployment:** Deployed on Google Firebase for high availability and scalability.
- Live chats in live section by **API pooling**

### GroceryStore [link](#): An online platform for ordering delicious dishes with a seamless user experience.

- Create React App (CRA):** Set up the project with CRA for fast, zero-config initialization, utilizing built-in support for JSX, ES6, and CSS modules.
- Performance & Optimization:** Used React.lazy for code-splitting, Webpack tree-shaking for smaller bundle sizes, and HMR for rapid development.
- State Management:** Managed complex app state using Redux and React Hooks.
- Testing:** Implemented unit and integration tests with Jest and React Testing Library.
- Firebase Deployment:** Hosted on Firebase and deployed production builds with caching and asset optimization.
